

# Commercial Analyst Europe @ UX (m/f/d)

## Position Description

The role will be responsible for coordinating and analyzing commercial planning — budgets, forecasts, and results — across the various countries or business units within the region.

The main objective is to provide accurate information and strategic analysis to support business decision-making.

## Main Responsibilities

- Consolidate budgets and forecasts from the countries within the region.
- Analyze variances between actual results, budgets, and forecasts.
- Identify trends, risks, and opportunities impacting business performance.
- Support regional management in strategic decision-making.
- Drive continuous improvement in reporting and commercial analysis processes.
- Collaborate closely with local teams and headquarters to ensure a consistent and aligned financial vision.

## Requirements

- Minimum of 3–5 years of experience in commercial or financial roles, preferably in the aviation, transport, or tourism sectors.
- Strong numerical aptitude and sound understanding of business and economic contexts.
- High proficiency in Spanish and English (minimum C1, spoken and written); intermediate to advanced German skills (B1–B2).
- Excellent command of financial and management analysis tools (advanced Excel, ERP, BI, etc.).
- Analytical, proactive, and results-oriented profile.
- Strong communication and teamwork skills in international environments.
